SUMMARY

Computer Science student at UTeM (**CGPA: 3.83**) with a strong foundation in software development, web technologies, and UI/UX design. Enjoys turning ideas into functional software from prototyping user interfaces to building secure backends and experimenting with cloud AI tools on Google Cloud. Looking for opportunities to learn, build, and contribute to real-world engineering teams

EDUCATION & CERTIFICATIONS

Universiti Teknikal Malaysia Melaka (UTeM) | Diploma in Computer Science (2025 – Present)

- **CGPA:** 3.83 | Dean's List Award (Anugerah Dekan) for Semester 1 & Semester 2

Google Cloud & Hack2skill | Google Cloud Gen AI Master Certificate (Aug 2026)

- Completed specialized training in AI Agent Development Kit (ADK), RAG pipelines, and enterprise data reasoning using Gemma 4 and BigQuery MCP Server.

SMK Putra Perdana | Malaysia Certificate of Education (2024)

- **GRADE:** Straight As - 1A+ 4A 3A-

TECHNICAL SKILLS

- **Languages & Core:** C++, Python, SQL, HTML5, CSS3, JavaScript
- **Cloud, AI & Backend:** Google Cloud Platform (Cloud Run, Secret Manager), Firebase (Auth, Firestore), Gemini API, BigQuery, RAG Architecture
- **Developer Tools & Design:** Git, GitHub, Linux / WSL2, VS Code, Figma, Canva

EXPERIENCE & INVOLVEMENT

Averis x GDG Monash Hackathon | Competitor & Software Architect (Sep 2026)

- Architected an autonomous trade document verification platform (Averis SDOC) in a competitive sprint, achieving a verified 1.0000 benchmark score on official evaluation data.

UM Hackathon (Universiti Malaya) | Competitor & Developer (Apr 2026)

- Collaborated in an intensive hackathon sprint to architect and develop a functional MVP solving a real-world problem statement, contributing to core logic and UI.

Freelance UI/UX Designer & Web Developer (2025)

- Designed end-to-end interactive prototypes and wireframes focusing on intuitive navigation & user flow.
- Built responsive, accessible front-end interfaces from design mockups, optimizing page load times and mobile usability

TECHNICAL PROJECTS

AI-Driven Retail Site Selection Agent | Gemma 4, Google BigQuery, Model Context Protocol (MCP), Python

- Developed an autonomous analytics agent to evaluate and recommend optimal retail/coffee shop locations based on spatial, demographic, and foot-traffic data.
- Implemented the Model Context Protocol (MCP) to bridge Gemma 4 directly with Google BigQuery, allowing the model to convert plain-language business prompts into structured SQL analytics queries automatically.

Averis SDOC — Autonomous Trade Document Verification Platform | Python, PostgreSQL (Supabase), Vercel

- Engineered a deterministic 3-stage reconciliation pipeline cross-auditing **7 mandatory trade fields (SI vs BL)** with automated unit normalization (MT to KG).
- Achieved a verified **1.0000 (100%) composite score** on score_cli.py across **520 records** with **zero false clearances**, slashing audit turnaround from ~2 hours to 1.24 seconds per record.
- Integrated **Human-in-the-Loop** exception handling for low OCR confidence (**<40%**), persisting synchronized relational audit trails to Supabase PostgreSQL.

LANGUAGES

- **Malay:** Native Proficiency
- **English:** Professional Working Proficiency
